Cum Laude Informatics Engineering graduate from Institut Teknologi Sepuluh Nopember (ITS) with experience in software engineering, web application development, analytics integration, and AI-based automation. Skilled in Laravel, .NET, Python, Postgre SQL, Git, Docker, and deep learning, with a strong academic foundation in Computer Vision, Image Processing, and Transformer-based Image Captioning.

EDUCATION

Institut Teknologi Sepuluh Nopember - Surabaya, Indonesia <i>Bachelor of Informatics Engineering, 3.59/4.00</i>	2021 - 2025
SMA Negeri 2 - Surabaya, Indonesia	2018 - 2021
SMP Negeri 1 - Surabaya, Indonesia	2015 - 2018

WORKING AND PROJECT EXPERIENCES

Junior Software Engineer <i>PT Sentra Vidya Utama (SEVIMA) - Company of IT Technology</i> - Developed, enhanced, and deploy multiple features in the IT Asset Management production level for Sentra Utama Group as part of the ORION Team, including stock opname, logging, audit trail, and asset management workflow improvements. Successfully assisted the team in managing IT assets for over 200+ employees. - Created dashboard with google analytics tracking adoption rate for Wiki SEVIMA and Knowledge Sevima websites production level to measure user adoption rate, monitor page engagement, and analyze user activity based on username, division, and accessed page. Successfully delivered strategic insights for C-level executives and the team by tracking and processing over 8,000+ user activities to monitor the platform's adoption rate - Improving and Testing Laravel based internal systems, database workflows, and deploy with Jenkins. Successfully deploy Knowledge Sevima and Wiki Sevima websites. - Maintenance Wiki SEVIMA production level with migrating data, including content migration into BookStack based Wiki SEVIMA, Docker based local setup, and staging preparation. Successfully help over 40 persons (3 team) to migrate data and develop. - Built an Agentic AI based web automation system to collect and process structured information from university websites.	Dec 2025 – Jun 2025
Software Developer - remote <i>PT Mitra Transformasi Digital - Company of IT Technology</i> - Developed backend applications using .NET C#, ASP.NET Core Web API, SQL Server, and Entity Framework Core to support API-based business workflows. - Built application modules with CRUD operations, authentication, role based access control, admin workflows, and database-driven process management. - Developed NextERP based project modules to support enterprise resource planning and internal operational workflows. - Created a Laravel Filament-based IT Management System for IT asset management, maintenance requests, procurement, technician assignment, approval workflow, and monitoring.	Nov 2025 - Present
Lecture Assistant of Database System (English Class) <i>Department of Informatics Engineering - ITS</i> - Delivered sessions on Oracle DBMS, Query Processing, Relational Model, and Physical Design - Successfully assisted lecturer to teaching and assessed the competency of 40+ students in one semester with English based language - Contribute to making assignment questions	Sep 2023 - Dec 2023
Practical Assistant of Database System <i>Department of Informatics Engineering - ITS</i> - Create practical question about social problem that must solved with database - Successfully handled the practical exam sessions for all class of database system	Sep 2023 - Dec 2023
Lecture Assistant of Framework Programming <i>Department of Informatics Engineering - ITS</i> - Tutoring sessions on Frontend such as Vue, React with Laravel and Node.js as a backend - Creating demo sessions for each students group to present the work results, and scoring with objective manner - Successfully assisted lecturer to teaching and assessed the competency of 60+ students in one semester	Sep 2024 - Dec 2024

Lecture Assistant of Computer Graphics <i>Department of Informatics Engineering - ITS</i> - Delivered sessions on make a game graphics using Unity Engine, and make a shadowing object and particle object in WebGL - Successfully assisted lecturer to teaching and assessed the competency of 40+ students in one semester	Sep 2024 - Dec 2024
Lecture Assistant of Human and Computer Interaction <i>Department of Informatics Engineering - ITS</i> - Tutoring sessions on HCI Concept, UI Design, and UX Design - Successfully assisted lecturer to teaching and assessed the competency of 120+ students in 2 class - Creating demo sessions for each students group to present the work results, and scoring with objective manner	Feb 2025 - May 2025
Data Science and VR Developer Internship <i>Indonesian Government Regional Revenue Agency of East Java Province</i> - Using the Particle Swarm Optimization algorithm to predict various regional revenues, such as house tax, land tax, and vehicle tax every 2 weeks, monthly, annually, and the last 5 years. - All the various regional revenues prediction results were visualized using Unity engine and then adapted to Virtual Reality, then the user can interact with the visualized statistics from Unity	Aug 2024 - Dec 2024
Software IT Support <i>Lecturer Project at Developing Kapuas Geographics Information Systems</i> Responsible for testing system functionalities, identifying and reporting bugs, and preparing user guide.	Aug 2024 - Dec 2024
Web Designer Project <i>SMA Negeri 2 Surabaya</i> - Using the Figma to create prototype of Website Literasi Digital Smada Surabaya. - Lead the project team to make this prototype website	Mar 2023 - Dec 2023
NON ACADEMIC EXPERIENCES	
Excursion Study – Shibaura Institute of Technology, Japan <i>A program that allow participants to learn and socialize directly with Japanese shibaura students</i> - Learn to socialize with Japanese students culture and personality directly - Presenting about impressions of experience in front of Japanese students	May 2023 – Jun 2025
Human Resource Division – Department of Informatics Engineering ITS <i>Informatics Engineering Student Association</i> - Conducting cadre for 300+ new informatics engineering ITS students - Managing citizens in an informatics engineering environment - Responsible for managing the citizens of Informatics Engineering ITS	Feb 2023 - Dec 2023
Head of Facilitator and Security Division – Diesnatalis ITS 63 <i>ITS Anniversary Events</i> - Managing 50+ division members and provide a fair distribution of job descriptions - Controlling the performance of division members in carrying out their job descriptions - Create job desk concepts such as licensing letter systems, room licensing flows, event security systems - Successfully handled up to 1000+ participants everyday with minor problems - Successfully handled everyday competition agenda in 1 month	Sep 2023 - Oct 2023
Head of Permission Division – ISOMETRIC ITS 2023 <i>ITS Student Chapter of Mining Events</i> - Managing 30+ division members and provide a fair distribution of job descriptions - Controlling the performance of division members in carrying out their job descriptions - Create job desk concepts such as licensing letter systems, room licensing flows, event security systems - Successfully handled up to 200+ participants every weeks - Successfully handled every weekend agenda in 3 months	Mar 2023 - Jun 2023
Expert Staff of Licensing Division – INILHOITS! 2023 <i>ITS Promotion Event for Senior High School Students National Scale</i> - Managing 7 members and provide a fair distribution of job descriptions - Controlling the performance of subdivision members in carrying out their job descriptions - Create a licensing flow, creating mobilization flow for 1000+ participants when exploring ITS - Successfully handled up to 1000+ participants everyday for 3 days agenda	Dec 2022 - Jan 2023

Expert Staff of Security and Licensing Division – GERIGI ITS 2023

Jun 2023 - Aug 2023

Welcoming and introducing new students at ITS

- Managing 10 subdivision members and provide a fair distribution of job descriptions
- Controlling the performance of subdivision members in carrying out their job descriptions
- Create a licensing flow, security flow, mobilization flow, etc for up to 6000+ participants
- Successfully handled up to 6000+ participants while GERIGI ITS held

Staff of Security and Licensing Division – GERIGI ITS 2022

Jun 2022 - Aug 2022

Welcoming and introducing new students at ITS

- Do a licensing flow jobdesc , security flow jobdesc, mobilization flow jobdesc, etc for up to 6000+ participants
- Successfully handled up to 6000+ participants while GERIGI ITS held

OTHERS

- Interest and Experience: Software Engineer, Machine Learning, Deep Learning, Image Processing
- Skills: Teamwork , Problem Solving, Time Management, Communication
- Language Proficiency: TOEIC , TOEFL , TEFL
